

University of Edinburgh

Research Fellow in Magnetic Resonance Imaging

Medicine and Veterinary Medicine College

£30,424 to £36,298

A post-doctoral Scientist with a proven track record in Magnetic Resonance Imaging (MRI) research is required to join the existing MRI research team at the Clinical Research Imaging Centre (CRIC) at the University of Edinburgh.

The post provides an excellent opportunity for the Research Fellow to develop their own program of clinical imaging research at the same time as supporting established clinical MRI research in CRIC and leading on the setup of new projects within the centre by clinical researchers from both NHS and University.

The Research Fellow will join a dedicated research team of experienced Medical Physics, Radiology and Clinical Science researchers and work within the framework of the Wellcome Trust Clinical Research Facility and Scottish Imaging Network (SINAPSE).
