1

Motivation

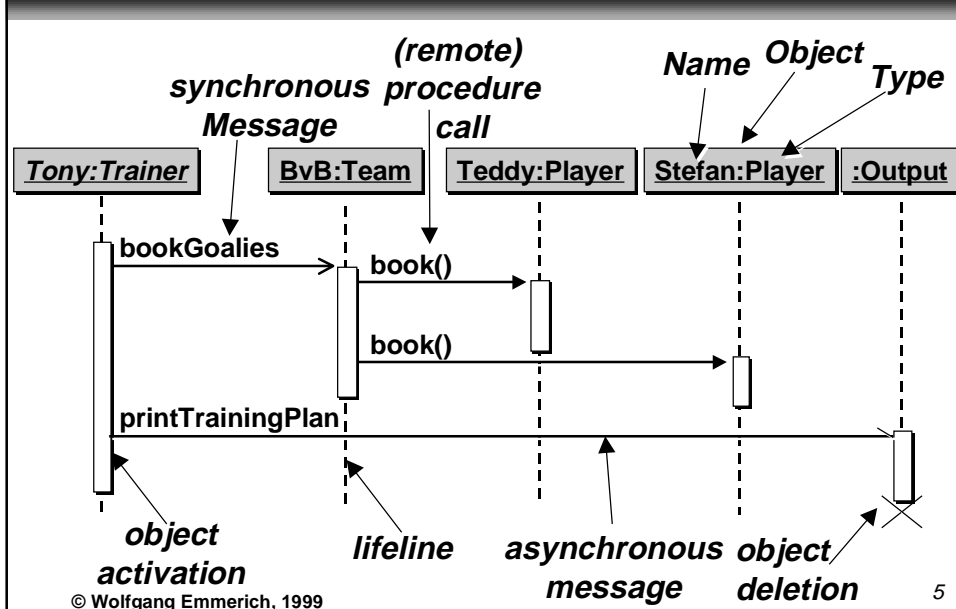

- ***In the early 90s: Development of about 10 OOAD notations***
- ***Used for communicating about objects***
 - *Static vs. dynamic properties*
 - *Type vs. instance properties*
- ***In 96/97: Unification of major notations by 3 amigos (Booch, Rumbaugh, Jacobson)***
- ***In Nov. 97: Adoption as OMG standard***
- ***Will be de-facto industry standard notation***
- ***Here: use for design of distributed objects***₂
