

Curriculum Vitae

Byron Cook

Affiliations: University College London (UCL) and Amazon Web Services (AWS)

Email: byroncook@gmail.com

URL: <http://www0.cs.ucl.ac.uk/staff/b.cook/>

Short biography

Dr. Byron Cook is *Professor of Computer Science* at UCL and *Director of Automated Reasoning* at AWS. Byron's interests include many topics in formal methods, logic, and their applications, *e.g.* biological systems, hardware design, networking, operating systems, programming languages, and security. Byron's work has gained significant attention, *e.g.* a substantial publication record, numerous keynote speaker invitations, and press coverage from Economist, Financial Times, Science, Scientific American, TechCrunch, Vogue, and Wired. Byron's recent work at AWS has focused on automated logic-based reasoning for cloud security, with applications to cryptography, networks, policies, and virtualization. Prior to joining AWS, Byron was particularly well known for his work on automatic methods for proving program termination and the TERMINATOR termination prover. This work represented a breakthrough, challenging the prevailing opinion in computer science at the time that automatic termination proving was impossible. Byron was also known for his contributions to SLAM and the Microsoft product Static Driver Verifier, which is sometimes credited for the revival of automatic program verification research.

Publications

Refereed conference articles

1. *Formal reasoning about the security of Amazon Web Services*
Byron Cook
CAV [International Conference on Computer-Aided Verification], Oxford, 2018
2. *Semantic-based Automated Reasoning for AWS Access Policies using SMT*
John Backes, Pauline Bolognani, Byron Cook, Catherine Dodge, Andrew Gacek, Kasper Luckow, Neha Rungta, Oksana Tkachuk, Carsten Varming
FMCAD [International Conference on Formal Methods in Computer Aided Design], Austin, 2018
3. *Model checking boot code from AWS data centers*
B. Cook, K. Khazem, D. Kroening, S. Tasiran, M. Tautschnig and M. Tuttle.
CAV [International Conference on Computer-Aided Verification], Oxford, 2018
4. *Continuous formal verification of Amazon s2n*
Andrey Chudnov, Nathan Collins, Byron Cook, Josiah Dodds, Brian Huffman, Stephen Magill, Colm MacCarthaigh, Eric Mertens, Eric Mullen, Serdar Tasiran, Aaron Tomb, and Edwin Westbrook
CAV [International Conference on Computer-Aided Verification], Oxford, 2018

5. *SideTrail: Verifying Time-Balancing of Cryptosystems*
K. Athanasiou, B. Cook, M. Emmi, C. MacCarthaigh, D. Schwartz-Narbonne and S. Tasiran
VSTTE [Working Conference on Verified Software: Theories, Tools, and Experiments], Oxford, 2018
6. *T2: temporal property verification*
Marc Brockschmidt, Byron Cook, Samin Ishtiaq, Heidy Khlaaf, and Nir Piterman
TACAS [International Conference on Tools and Algorithms for the Construction and Analysis of Systems], Eindhoven, 2016
7. *On automation of CTL* verification for infinite-state systems*
Byron Cook, Heidy Khlaaf and Nir Piterman
CAV [International Conference on Computer-Aided Verification], San Francisco, 2015
8. *Spatial interpolants*
Aws Albarghouthi, Josh Berdine, Byron Cook and Zachary Kincaid
ESOP [European Symposium on Programming], London, 2015
9. *Fairness for infinite-state systems*
Byron Cook, Heidy Khlaaf and Nir Piterman
TACAS [International Conference on Tools and Algorithms for the Construction and Analysis of Systems], London, 2015
10. *Proving nontermination via safety*
Hong Yi Chen, Byron Cook, Carsten Fuhs, Kaustubh Nimkar, Peter W. O’Hearn
TACAS [International Conference on Tools and Algorithms for the Construction and Analysis of Systems], Grenoble, 2014
11. *Faster temporal reasoning for infinite-state programs*
Byron Cook, Heidy Khlaaf, Nir Piterman
FMCAD [International Conference on Formal Methods in Computer Aided Design], Lausanne, 2014
12. *Disproving termination with overapproximation*
Byron Cook, Carsten Fuhs, Kaustubh Nimkar, Peter O’Hearn
FMCAD [International Conference on Formal Methods in Computer Aided Design], Lausanne, 2014
13. *Finding instability in biological models*
Byron Cook, Jasmin Fisher, Benjamin A. Hall, Samin Ishtiaq, Garvit Juniwal, Nir Piterman
CAV [International Conference on Computer-Aided Verification], Vienna, 2014
14. *Better termination proving through cooperation*
Marc Brockschmidt, Byron Cook and Carsten Fuhs
CAV [International Conference on Computer-Aided Verification], St. Petersburg, 2013
15. *Reasoning about nondeterminism in programs*
Byron Cook and Eric Koskinen
PLDI [International Conference on Programming Language Design and Implementation], Seattle, 2013
16. *Ramsey vs. lexicographic termination proving*
Byron Cook, Abigail See, and Florian Zuleger
TACAS [International Conference on Tools and Algorithms for the Construction and Analysis of Systems], Rome, 2013
17. *At the interface of biology and computation*
Alex S. Taylor, Nir Piterman, Samin Ishtiaq, Jasmin Fisher, Byron Cook, Caitlin Cockerton, Sam

- Bourton, and David Benque
CHI [ACM SIGCHI Conference on Human Factors in Computing Systems], Paris, 2013
18. *BMA: visual tool for modeling and analysis of biological networks* (tool paper)
David Benque, Sam Bourton, Caitlan Cockerton, Byron Cook, Jasmin Fisher, Samin Ishtiaq, Nir Piterman, Alex Taylor, Moshe Vardi
CAV [International Conference on Computer-Aided Verification], Berkeley, 2012
 19. *Temporal property verification as a program analysis task*
Byron Cook, Eric Koskinen, Moshe Vardi
CAV [International Conference on Computer-Aided Verification], Snowbird, 2011
 20. *SLayer: Memory safety for systems-level code*
Josh Berdine, Byron Cook, Samin Ishtiaq
CAV [International Conference on Computer-Aided Verification], Snowbird, 2011
 21. *Making prophecies with decision predicates*
Byron Cook and Eric Koskinen
POPL [International Symposium on Principles of Programming Languages], Austin, 2011
 22. *Proving stabilization of biological systems*
Byron Cook, Jasmin Fisher, Elzbieta Krepska, Nir Piterman
VMCAI [International Conference on Verification, Model Checking, and Abstract Interpretation], Savannah, 2011
 23. *Tractable Reasoning in a Fragment of Separation Logic*
Byron Cook, Christoph Haase, Joel Ouaknine, Matthew Parkinson and James Worrell
CONCUR [International Conference on Concurrency Theory], Aachen, 2011
 24. *Ranking function synthesis for bit-vector relations*
Byron Cook, Daniel Kroening, Philipp Ruemmer, and Christoph Wintersteiger
TACAS [International Conference on Tools and Algorithms for the Construction and Analysis of Systems], Paphos, 2010
 25. *Finding heap-bounds for hardware synthesis*
Byron Cook, Ashutosh Gupta, Stephen Magill, Andrey Rybalchenko, Jiri Simsa, Satnam Singh, and Viktor Vafeiadis
FMCAD [International Conference on Formal Methods in Computer Aided Design], Austin, 2010
 26. *Proving that non-blocking algorithms don't block*
Alexey Gotsman, Byron Cook, Matthew Parkinson, and Viktor Vafeiadis
POPL [International Symposium on Principles of Programming Languages], Savannah, 2009
 27. *Proving conditional termination*
Byron Cook, Sumit Gulwani, Tal Lev-Ami, Andrey Rybalchenko, and Mooly Sagiv
CAV [International Conference on Computer-Aided Verification], Princeton, 2008
 28. *Scalable shape analysis for systems code*
Hongseok Yang, Oukseh Lee, Josh Berdine, Cristiano Calcagno, Byron Cook, Dino Distefano, and Peter O'Hearn
CAV [International Conference on Computer-Aided Verification], Princeton, 2008
 29. *Ranking abstractions*
Aziem Chawdhary, Byron Cook, Sumit Gulwani, Mooly Sagiv, and Hongseok Yang
ESOP [European Symposium on Programming], Budapest, 2008
 30. *Proving thread termination*
Byron Cook, Andreas Podelski, and Andrey Rybalchenko,
PLDI [International Conference on Programming Language Design and Implementation], San Diego, 2007

31. *Thread-modular shape analysis*
Alexey Gotsman, Josh Berdine, Byron Cook, and Mooly Sagiv,
PLDI [International Conference on Programming Language Design and Implementation], San Diego, 2007
32. *Local reasoning for storable locks and threads*
Alexey Gotsman, Josh Berdine, Byron Cook, Noam Rinetzky, and Mooly Sagiv
APLAS [Asian Symposium on Programming Languages and Systems], Singapore, 2007
33. *Proving that programs eventually do something good*
Byron Cook, Alexey Gotsman, Andreas Podelski, Andrey Rybalchenko, and Moshe Vardi
POPL [International Symposium on Principles of Programming Languages], Nice 2007
34. *Variance analyses from invariance analyses*
Josh Berdine, Aziem Chawdhary, Byron Cook, Dino Distefano, and Peter O’Hearn
POPL [International Symposium on Principles of Programming Languages], Nice 2007
35. *Shape analysis for composite data structures*
Josh Berdine, Cristiano Calcagno, Byron Cook, Dino Distefano, Peter O’Hearn, Thomas Wies,
and Hongseok Yang
CAV [International Conference on Computer-Aided Verification], Berlin, 2007
36. *Arithmetic strengthening for shape analysis*
Stephen Magill, Josh Berdine, Edmund Clarke, and Byron Cook,
SAS [International Static Analysis Symposium], Denmark, 2007
37. *Proving termination by divergence*
Domagoj Babic, Byron Cook, Alan Hu, and Zvonimir Rakamaric
SEFM [International Conference on Software Engineering and Formal Methods], London, 2007
38. *Shape analysis by graph decomposition*
Roman Manevich, Josh Berdine, Byron Cook, Ganesan Ramalingam, and Mooly Sagiv
TACAS [International Conference on Tools and Algorithms for the Construction and Analysis of
Systems], Braga, 2007
39. *Over-approximating Boolean programs with unbounded thread creation*
Byron Cook, Daniel Kroening, Natasha Sharygina
FMCAD [International Conference on Formal Methods in Computer Aided Design], San Jose,
2007
40. *Interprocedural shape analysis with separated heap abstractions*
Alexey Gotsman, Josh Berdine, and Byron Cook
SAS [International Symposium on Static Analysis], Seoul, 2007
41. *Automatic termination proofs for programs with shape-shifting heaps*
Josh Berdine, Byron Cook, Dino Distefano, and Peter O’Hearn
CAV [International Conference on Computer-Aided Verification], Seattle, 2006
42. *Terminator: Beyond safety*
Byron Cook, Andreas Podelski, and Andrey Rybalchenko
CAV [International Conference on Computer-Aided Verification], Seattle, 2006
43. *Repair of Boolean programs with an application to C*
Andreas Griesmayer, Roderick Bloem, and Byron Cook
CAV [International Conference on Computer-Aided Verification], Seattle, 2006
44. *Termination proofs for systems code*
Byron Cook, Andreas Podelski, and Andrey Rybalchenko
PLDI [International Conference on Programming Language Design and Implementation], Ottawa,
2006

45. *Thorough static analysis of device drivers*
Thomas Ball, Ella Bounimova, Byron Cook, Vladimir Levin, Jakob Lichtenberg, Con McGarvey, Bohus Ondrusek, Sriram K. Rajamani, Abdullah Ustuner
EuroSys [European Systems Conference], Leuven, 2006
46. *Abstraction-refinement for termination*
Byron Cook, Andreas Podelski, Andrey Rybalchenko
SAS [International Symposium on Static Analysis], London, 2005
47. *Using Stålmarck's algorithm to prove inequalities*
Byron Cook and George Gonthier
ICFEM [International Conference on Formal Engineering Methods], Manchester, 2005
48. *Predicate abstraction via symbolic decision procedures*
Shuvendu Lahiri, Thomas Ball, and Byron Cook
CAV [International Conference on Computer-Aided Verification], Edinburgh, 2005
49. *Cogent: Accurate theorem proving for program verification*
Byron Cook, Daniel Kroening, and Natasha Sharygina
CAV [International Conference on Computer-Aided Verification], Edinburgh, 2005
50. *Zapato: Automatic theorem proving for predicate abstraction refinement*
Thomas Ball, Byron Cook, Shuvendu K. Lahiri, and Lintao Zhang
CAV [International Conference on Computer-Aided Verification], Boston, 2004
51. *Refining approximations in software predicate abstraction*
Thomas Ball, Byron Cook, Satyaki Das, and Sriram K. Rajamani
TACAS [International Conference on Tools and Algorithms for the Construction and Analysis of Systems], Barcelona, 2004
52. *SLAM and Static Driver Verifier: technology transfer of formal methods inside Microsoft*,
Thomas Ball, Byron Cook, Vladimir Levin and Sriram K. Rajamani.
IFM [International Conference on Integrated Formal Methods], Kent, 2004
53. *Accurate theorem proving for program verification*,
Byron Cook, Daniel Kroening, Natasha Sharygina,
ISoLA [Leveraging Applications of Formal Methods], Paphos, 2004
54. *A symbolic approach to predicate abstraction*
Shuvendu K. Lahiri, Randall E. Bryant, and Byron Cook
CAV [International Conference on Computer-Aided Verification], Boulder, 2003
55. *A proof engine approach to solving combinational design automation problems*
Gunnar Andersson, Per Bjesse, Byron Cook, and Ziyad Hanna
DAC [Design Automation Conference], Las Vegas, 2002
56. *A framework for microprocessor correctness statements*
Mark Aagaard, Byron Cook, Nancy Day, and Robert Jones
CHARME [Advanced Research Working Conference on Correct Hardware Design and Verification Methods], Edinburgh, 2001
57. *Combining stream-based and state-based verification techniques for microarchitectures*
Mark Aagaard, Byron Cook, and Nancy Day
FMCAD [International Conference on Formal Methods in Computer Aided Design], Austin, 2000
58. *Formal verification of explicitly parallel microprocessors*
Byron Cook, John Launchbury, John Matthews, and Dick Kieburtz
CHARME [Advanced Research Working Conference on Correct Hardware Design and Verification Methods], Bad Herrenalb, 1999

59. *On embedding a microarchitectural design language within Haskell*
John Launchbury, Jeff Lewis and Byron Cook
ICFP [International Conference on Functional Programming], Paris, 1999
60. *Microprocessor specification in Hawk*
John Matthews, John Launchbury, and Byron Cook
ICCL [International Conference on Computer Languages], Chicago, 1998

Refereed journal articles

61. *Verifying Increasingly Expressive Temporal Logics for Infinite-State Systems*
B. Cook, H. Khlaaf, and N. Piterman.
Journal of the the ACM, 64, 2, Article 15 (May 2017), 39 pages.
62. *Drug target optimization in chronic myeloid leukemia using innovative computational platform*
R. Chuang, B. Hall, D. Benque, B. Cook, S. Ishtiaq, N. Piterman, A. Taylor, M. Vardi, S. Koschmieder, B. Gottgens, and J. Fisher
Scientific Reports, 5:8190, Nature Publishing Group, February 2015
63. *Relations*
Tauba Auerbach, Byron Cook, David Reinfurt
Bulletins of the Serving Library, 2014
64. *Mathematical artifacts*
Byron Cook
Parkett 94, 2014
65. *Ranking function synthesis for bit-vector relations*
Byron Cook, Daniel Kroening, Philipp Rümmer, Christoph Winterstieger
International Journal on Formal Methods in System Design, March, 2013
66. *Proving termination of nonlinear command sequences*
Domagoj Babic, Byron Cook, Alan J. Hu, Zvonimir Rakamaric
International Journal on Formal Aspects of Computing (special issue from SEFM), 2013
67. *Temporal property verification as a program analysis task (extended version)*
Byron Cook, Eric Koskinen, Moshe Vardi
International Journal on Formal Methods in System Design (special issue from CAV), 2012
68. *Proving program termination*
Byron Cook, Andreas Podelski, Andrey Rybalchenko
Communications of the ACM, Volume 54 Issue 5, May 2011
69. *Summarization for termination*
Byron Cook, Andreas Podelski, and Andrey Rybalchenko
International Journal on Formal Methods in System Design, Vol 35, pp. 369–387
70. *Software engineering and formal methods*
Mike Hinchey, Michael Jackson, Patrick Cousot, Byron Cook, Jonathon P. Bowen
Communications of the ACM, Vol. 51, 2008, pp. 54-59
71. *Verification of Boolean programs with unbounded thread creation*
Byron Cook, Daniel Kroening, and Natasha Sharygina
Journal of Theoretical Computer Science, Vol. 388, 2007, pp. 227-242
72. *Predicate abstraction via symbolic decision procedures*
Shuvendu Lahiri, Tom Ball, and Byron Cook
Journal of Logic Methods in Computer Science, Vol. 3(1:2), 2007, pp. 1-20

73. *Design automation with mixtures of proof strategies for propositional logic*
Gunnar Andersson, Per Bjesse, Byron Cook, and Ziyad Hanna
IEEE Transactions on CAD, Vol. 22(8), 2003, pp. 1042-1048
74. *A framework for microprocessor correctness statements*
Mark Aagaard, Byron Cook, Nancy Day, and Robert Jones
International Journal on Software Tools for Technology Transfer, Vol 4(3), 2002, pp. 298-312

Books

75. *Program termination*
Byron Cook
Cambridge University Press (forthcoming)
76. *Computer Aided Verification*
Byron Cook, Tayssir Touili, Paul Jackson (Eds.)
Springer, 2010
77. *Formal Methods for Industrial Critical Systems*
Maria Alpuente, Byron Cook, Christophe Joubert (Eds.)
Springer, 2009
78. *Proceedings of the 8th International Conference on Verification, Model Checking, and Abstract Interpretation (VMCAI)*
Byron Cook and Andreas Podelski (Eds.)
Springer, 2007

Journal special issues

79. *Special Issue on Satisfiability Modulo Theories*
Byron Cook and Roberto Sebastiani (Eds.)
Journal on Satisfiability, Boolean Modeling and Computation

Workshop articles

80. *Learning to decipher the heap for program verification*
Mark Brockschmidt, Yuxin CHen, Byron Cook, Pushmeet Kohli, and Daniel Tarlow
Workshop on Constructive Machine Learning at ICML, 2015
81. *Symbolic model checking for asynchronous Boolean programs*
Byron Cook, Daniel Kroening, and Natasha Sharygina
SPIN [SPIN Workshop on Model Checking of Software], San Francisco, 2005
82. *Specifying superscalar microprocessors in Hawk*
Byron Cook, John Launchbury, and John Matthews
FTH [International Workshop on Formal Techniques for Hardware], Marstrand, 1998
83. *Disposable memo functions*
Byron Cook and John Launchbury
Haskell Workshop, Amsterdam, 1997

Invited articles

84. *Formal reasoning about the security of Amazon Web Services*
Byron Cook
CAV [International Conference on Computer-Aided Verification], Oxford, 2018

85. *Principles of program termination*
Byron Cook
Lecture notes from 2008 Marktoberdorf summer school (Marktoberdorf)
86. *Advances in Program Termination and Liveness*
Byron Cook
VMCAI [International Conference on Verification, Model Checking, and Abstract Interpretation], Savannah, 2009
87. *Computing bounds on space and time for hardware compilation*
Byron Cook
FMCAD [Formal Methods in Computer Aided Design], Portland, 2008
88. *Automatically proving program termination*
Byron Cook
CAV [International Conference on Computer-Aided Verification], Berlin, 2007
89. *Bringing hardware and software closer together with termination analysis*
Byron Cook
MEMOCODE [International Conference on Formal Methods and Models for Codesign], Nice, 2007
90. *Automatically Proving Concurrent Programs Correct*
Byron Cook
SEFM [IEEE International Conference on Software Engineering and Formal Methods], London, 2007
91. *Finding bugs in device drivers with Static Driver Verifier*
Byron Cook
ASM [International Conference on Abstract State Machines], Paris, 2005
92. *Finding API usage rule violations in Windows device drivers using Static Driver Verifier*
Byron Cook
ISoLA [Leveraging Applications of Formal Methods], Paphos, 2004

Grants

- “IRIS: Interface Reasoning for Interacting Systems” (EPSRC program grant), 6.1m GBP
- “Compositional Security Analysis for Binaries” (EPSRC), 290k GBP
- “Boosting Automated Verification Using Cyclic Proof” (EPSRC), 550k GBP
- “Program Verification Techniques for Understanding Security Properties of Software” (EPSRC), 877k GBP
- “Resource Reasoning” (EPSRC), 3.1m GBP

Awards

- Roger Needham Award, 2009. The Roger Needham Award is made annually by the British Computer Society for a distinguished research contribution in computer science by a UK based researcher within ten years of their PhD. The award includes a 5,000 GBP cash prize, and a public lecture at the UK’s Royal Society in London.

Tools developed

- ZELKOVA* : Constraint-based IAM policy reasoning tool. Internal Amazon tool used by Amazon/AWS products S3, Macie, Trusted Advisor, Config, and various internal tools. Discussed in <https://www.youtube.com/watch?v=Wvyc-VEU0ns&t=2214> and <https://www.wired.com/story/aws-cloud-security-tools-leaks/> .
- TIROS* : Constraint-based EC2 network reasoning tool. Internal Amazon tool used by forthcoming Amazon/AWS product and various internal tools. Discussed in <https://www.wired.com/story/aws-cloud-security-tools-leaks/> .
- BMA* : Biological model analysis tool
<http://biomodelanalyzer.org/> Used in drugs discovery research by companies such as AstraZeneca (as discussed in <https://www.youtube.com/watch?v=00Evk79JW78>)
- TERMINATOR and T2 : Program termination prover
<http://github.com/mmjb/T2>
- SLAYER* : Shape analysis engine
<http://research.microsoft.com/SLayer>
- SLAM : Symbolic software model checker
<http://research.microsoft.com/SLAM>
- Static Driver Verifier : Device driver correctness tool (Microsoft Windows product released through the Windows Device Driver Development Kit)
<https://docs.microsoft.com/en-us/windows-hardware/drivers/devtest/static-driver-verifier>
- ZAPATO : Microsoft internal decision procedure framework used in SLAM. Note that ZAPATO led to ZAP, which led to Z3
- PROVER CL : Propositional SAT solver
<http://www.prover.com/products/ppi/cl.xml>
- PROVER SL : Symbolic model checker for finite-state systems
<http://www.prover.com/products/ppi/sl.xml>
- HLSPEC : High-level microprocessor design language and tools (Intel internal)
- HAWK : High-level microprocessor design language and tools
<http://www.cse.ogi.edu/PacSoft/projects/Hawk/>

For tool names marked with *, Byron was involved in the founding, strategy, and/or design, but did not write/maintain the source code.

Invited, plenary, keynote and tutorial talks

- FLoC [Federated Logic Conference], Oxford, 2018. FLoC occurs every 4 years as the amalgamation of CAV, CSF, FM, FSCD, ICLP, IJCAR, ITP, LICS, SAT
 - Plenary speaker. See <https://www.youtube.com/watch?v=JfjLKB027nw>
 - Invited speaker, “Formal methods in Industry” special session
 - Verification and Deduction Mentoring Workshop
- SPLASH/OOPSLA, 2018
- Philosophical Society of Washington, Lecture 2382, Washington DC, 2017

- Midlands Graduate School Christmas Seminar, 2009

- HCSS [International Conference on High Confidence Software and Systems], Baltimore, 2009
- NFM [NASA Formal Methods Symposium], Moffett Field, 2009
- VMCAI [International Conference on Verification, Model Checking, and Abstract Interpretation], Savannah, 2009
- IFM [Integrated Formal Methods], Dusseldorf, 2009
- Infinity [International Workshop on Verification of Infinite-State Systems], Bologna, 2009
- Workshop on Applied Logic: Inductive and Deductive Reasoning, 2009
- IFIP Working Group 2.3, Cambridge, 2008
- Marktoberdorf Summer School, 2008
- FMCAD [Formal Methods in Computer Aided Design], Portland, 2008
- HCSS [International Conference on High Confidence Software and Systems], Baltimore, 2008
- International Summer School on Trends in Concurrency (Prague), 2008
- CAV Workshop on Numerical Abstractions for Software Verification, 2008
- Science of Security Workshop, Berkeley, 2008
- QCon Enterprise Software Development Conference, San Francisco, 2007
- CAV [International Conference on Computer-Aided Verification] Berlin, 2007
- HCSS [International Conference on High Confidence Software and Systems], Baltimore, 2007
- MEMOCODE [International Conference on Formal Methods and Models for Codesign] (Nice), 2007
- SEFM [IEEE International Conference on Software Engineering and Formal Methods] London, 2007
- Seminar on the Challenge of Software Verification, Dagstuhl, 2006
- WST [International Workshop on Termination], Seattle, 2006
- SVV [International Workshop on Software Verification and Validation], Seattle, 2006
- AVoCS [International Workshop on Automated Verification of Critical Systems], Nancy, 2006
- ARW [Automated Reasoning Workshop], Bristol, 2006
- ICSSR [International Computer Science Symposium in Russia], St. Petersburg, 2006
- ESCAR [CADE Workshop on Empirically Successful Classical Automated Reasoning], 2005
- DISPROVING [Workshop on Disproving - Non-Theorems, Non-Validity, Non-Provability] Tallinn, 2005
- ASM [International Workshop on Abstract State Machines], Paris, 2005
- Combination of Decision Procedures Summer School, Stanford, 2004
- HCSS [Conference on High Confidence Software and Systems], Baltimore, 2004
- ISoLA [Leveraging Applications of Formal Methods] (Paphos)
- Colloquium L'ingnierie du logiciel, Paris, 2004

- DAC [Design Automation Conference], Las Vegas 2001
- University colloquium lectures at Stanford, Berkeley, Carnegie Mellon, Harvard, MIT, ETH, INRIA, University of Toronto, University of Birmingham, University of Manchester, University of British Columbia, University of Utah, University of Colorado, Oxford, Cambridge, Chalmers, and New York University. See <https://vimeo.com/81641895> for an example.
- Microsoft Techfest¹ in 2011, 2009, 2007, 2006, and 2005
<https://www.youtube.com/watch?v=V91oBk-nWCg>
https://archive.org/details/Microsoft_Research_Video_104033

Panel discussions

- NASA Formal Methods Symposium, Moffett Field, 2009
- Science of Security Workshop, Berkeley, 2008
- SMT [International Workshop on Satisfiability Modulo Theories], Princeton, 2008
- HCSS [International Conference on High Confidence Software and Systems], Baltimore, 2008
- University of Illinois Affiliates Conference, 2006
- MEMOCODE [International Conference on Formal Methods and Models for Codesign] Verona, 2005

Professional activities

- Advisory board
 - DeepSpec/NSF
- Program committee appointments:
 - 2017– : no longer accepting program committee requests
 - VMCAI [International Conference on Verification, Model Checking, and Abstract Interpretation], 2017
 - CAV [International Conference on Computer-Aided Verification], 2015
 - CAV [International Conference on Computer-Aided Verification], 2014
 - CAV [International Conference on Computer-Aided Verification], 2013
 - RTA [Rewriting Techniques and Applications], 2013
 - PLDI [International Conference on Programming Language Design and Implementation], 2012
 - FMCAD [Formal Methods in Computer-Aided Design], 2012
 - SAS [International Static Analysis Symposium], 2011
 - FM [International Symposium on Formal Methods], 2011

¹Techfest is a Microsoft event in which researchers give lectures and make demos available to Microsoft employees and the press. The event is high-profile (>30,000 attendees) and the lectures are selected using a competitive process.

- PADL [International Symposium on Practical Aspects of Declarative Languages], 2011
- SAS [International Static Analysis Symposium], 2010
- CAV [International Conference on Computer-Aided Verification], 2010
- CAV [International Conference on Computer-Aided Verification], 2009
- FMICS [Formal Methods for Industrial Critical Systems], 2009
- WST [International Workshop on Termination], 2009
- POPL [Symposium on Principles of Programming Languages], 2008
- TACAS [International Conference on Tools and Algorithms for the Construction and Analysis of Systems], 2008
- SSV [International Workshop on Systems Software Verification], 2008
- LPAR [International Conference on Logic for Programming Artificial Intelligence and Reasoning], 2007
- VMCAI [International Conference on Verification, Model Checking, and Abstract Interpretation], 2007
- TACAS [International Conference on Tools and Algorithms for the Construction and Analysis of Systems], 2007
- SMT [International Workshop on Satisfiability Modulo Theories], 2007
- SV [International Workshop on System Verification], 2007
- TV [Thread Verification Workshop], 2006
- PDPAR [Pragmatics of Decision Procedures in Automated Reasoning], 2006
- SoftMC [Software Model Checking Workshop], 2005
- CUFP [ICFP Workshop on Commercial Users of Functional Programming], 2004
- SoftMC [Software Model Checking Workshop], 2003
- CHARME [Advanced Research Working Conference on Correct Hardware Design and Verification Methods], 2003
- Co-organizer, HCSS [International Conference on High Confidence Software and Systems], Annapolis, 2013
- External review committee, PLDI [International Conference on Programming Language Design and Implementation], 2013
- External review committee, PLDI [International Conference on Programming Language Design and Implementation], 2010
- Steering committee, International Workshop on Satisfiability Modulo Theories
- Co-chair, CAV [International Conference on Computer-Aided Verification], Edinburgh, 2010
- Co-chair, FMICS [Formal Methods for Industrial Critical Systems], Eindhoven, 2009
- Workshops chair, CAV [International Conference on Computer-Aided Verification], Princeton, 2008
- Associate Editor, ACM Transactions on Programming Languages and Systems, 2009-2012
- Guest co-editor, Journal on Satisfiability, Boolean Modeling, and Computation (Special Issue on Satisfiability Modulo Theories),
- Program chair for tools papers, TACAS [International Conference on Tools and Algorithms for the Construction and Analysis of Systems], 2008

- Co-organizer, *Seminar on Deduction and Decision Procedures*, Schloss Dagstuhl, 2007
- Co-chair, AHA [International Symposium on Automatic Heap Analysis], 2007
- Co-chair, VMCAI [International Conference on Verification, Model Checking, and Abstract Interpretation], 2007
- Co-organizer, SSPV [Symposium on SAT-solvers and Program Verification], 2006
- Co-chair, PDPAR [Pragmatics of Decision Procedures in Automated Reasoning], 2006
- Program chair for tools papers, TACAS [International Conference on Tools and Algorithms for the Construction and Analysis of Systems], 2007
- Co-organizer of SoftMC'05 and SoftMC'03 [CAV Workshop on Software Model Checking]
- Co-organizer of CFDP'05 [Cambridge Forum on Decision Procedures]
- External Ph.D. reviewer: Albert Oliveras (Barcelona), Stephen Magill (CMU), Daron Vroon (Georgia Tech), Jonathan Heusser (Queen Mary), Jules Villard (Cachan), Elzbieta Krepska (VU Amsterdam)
- Grant reviewing: UK Engineering and Physical Sciences Research Council (EPSRC), European Research Council (ERC)
- Committee EAPLS Best PhD Dissertation Award 2011
- MSR Internship supervision: Aws Albarghouti, Mary Boeker, Marc Brockschmidt, Hongyi Chen, Ashutosh Gupta, Mihaela Gheorghiu, Alexey Gotsman, Christoph Haase, Zachary Kincaid, Heidi Khlaaf, Matt Lewis, Shuvendu Lahiri, Stephen Magill, Andrei Popescu, Patrick Rondon, Andrey Rybalchenko, Abigail See, Vlad Shcherbina, Jiri Simsa, Thomas Stroeder, Viktor Vafeiadis, Georg Weissenbacher, Thomas Wies, and Greta Yorsh.

Work history

Academic positions

- University College London, Professor (joint with Microsoft and now Amazon), 2012-Current
- Queen Mary, University of London, Professor (joint with Microsoft), 2008-2012
- Carnegie Mellon University, Visiting Professor, 2008
- Queen Mary, University of London, Visiting Professor, 2006-2008
- Chalmers University, Visiting Lecturer, 2005-2006
- The Evergreen State College, Adjunct Lecturer, 1996-1998
- Portland Community College, Adjunct Lecturer, 1996-1997
- Oregon Institute of Technology, Adjunct Lecturer, 1997

Industrial positions

- Amazon Web Services, 2014-Current
 - Director, 2017-Current
 - Senior Principal Engineer, 2014-2017
- Microsoft Research 2004-2014
 - Principal Researcher, group manager (Programming, Principles, and Tools group), MSR-Cambridge senior leadership team member 2011-2014
 - Principal Researcher, 2009-2011,
 - Senior Researcher, 2008-2009,
 - Researcher, 2004-2008
- Microsoft, Software developer (Base OS kernel team), 2002-2004
- Prover Technology AB, Pre-sales engineer, 1999-2002
- Intel Strategic CAD Labs, Software developer, 1998-1999

Education

- Ph.D. The Oregon Graduate Institute of Science and Technology, 2005, Advisor: John Launchbury
- B.Sci. The Evergreen State College, 1995.
- Secondary/high school – The Jefferson County Open School (Colorado), 1990
