Hailes, Jamieson, Karp

2008-2009, Term 2

One-pager: MRD

Due: start of lecture, 30 January 2009

Instructions: answer the following question as succinctly as possible in 200–500 words (roughly one double-spaced, typed page).

Today's paper proposes an acknowledgement protocol between the MRDS and MRDC that operates in addition to and on top of the synchronous acknowledgements of 802.11. First, very briefly explain how this acknowledgement protocol works. Then, provide **two** examples of when it is needed, and what happens in each example.
